

INSTALLATION of BOS-X

Contains BOS, DupSoft, BridgeTab; and a range of other programs

BOS-X is only compatible with the Prim versions of BridgeSorter and Duplimate MkV. Do NOT install this version if you have a BridgeSorter with a number below 570, or a Duplimate Mk V with number 1700-1849, unless you have had your machine upgraded. (Duplimate Mk 4.x can use this version.)

Contact support@bridgesorter-com or support@duplimate.com for details.

Re. DOWNLOAD AND INSTALLATION

The BOS package is comprehensive (120 MB) and you must let the download be completed before you start the installation. [Start download now.](#)

Note that you must prevent that Windows searches for updates (in some Windows versions you have to click the option *Skip looking for Windows updates* to prevent this).
